

**Symposium “Myocardial aging and cardiometabolic disorders”
Auditorium de la Galerie de l’Evolution
Museum d’Histoire Naturelle**

Monday 4th June

Morning session: From cardiac aging to HFpEF:

Chairpersons: Michel Komajda and Jean-Luc Dubois-Randé

10:00 – 10:30 HFpEF: Epidemiology and Mechanisms: Joseph Hill

10:30 – 11:00: Non-ischemic heart failure: genes, aging and inflammation: Stephan Heymans

11:00 – 11:30: What is cardiac aging? Daigo Sawaki

11:30- 12:00 : Targeting cellular aging for the treatment of cardiovascular diseases : Tohru Minamino

12:00 – 12:45 : Key Note Lecture by Dr Elizabeth Blackburn

Lunch

Afternoon session: Metabolism and cardiac aging

Chairpersons: Christian Boitard and Geneviève Derumeaux

14:00- 14:30 : Microbiote and cardiometabolic disorders : Karine Clément

14:30-15:00 : Diabetes and inflammation : Agnès Lehuen

15:00-15:30 : Diabetes and ageing : Etienne Larger

15:30 – 16:00 : Role of epicardial adipose tissue in atrial remodeling : Stephane Hatem

16:00 – 16:30 : Cross-talk between visceral adipose tissue and myocardium : Maria Pini

Tuesday 5th June

Morning session: What is new in myocardial aging?

Chairpersons: Serge Adnot and Jorge Boczkowski

9:30 – 10:00 Epigenetic aging and cardiovascular health Devin Habsher

10:00 – 10:15 Epigenetic aging and metabolic cardiomyopathy Corneliu Henegar

10:15 – 10:30: Coffee break

10:30- 11:00 : Aging and Heart Valves Philippe Pibarot

11:00 – 11:30 : Chemotherapy : a model of accelerated cardiac aging ? Aarti Asnani

11:30 – 12:00: Amyloidosis : an underestimated process in cardiac aging ? Thibaud Damy (TBC)

12:00- 12:30 : Chronic intermittent hypoxemia and cardiac disorders TBC
