

Why study VULNERABILITY

Vulnerability is particularly important in the field of health and well-being.

Vulnerability is linked to multiple factors and depends on their interaction both at one time and throughout life.

Advancing knowledge on vulnerability thus requires **expertise in health, economics and environmental sciences** in order to consider health, environmental stressors and socioeconomic inequality from a **lifetime perspective**.

A broader perspective on vulnerability assessment implies to conduct a **multidimensional, multilevel and multidirectional analysis** and to integrate the work of several fields.

HOW TO APPLY

Eligibility & selection criteria

High potential students will be selected among UPEC and other national and international universities.

Studying Vulnerability in Health

with an interdisciplinary approach in the fields of

Health & biology

Public health & epidemiology

Economics

Chemistry & environment

Career outcomes

Both public and private actors helped design the EUR-LIVE programme in order to make sure its educational curriculum aligns as much as possible with the job market.

To pursue a career in national and international health and public health agencies as well as in private companies.

Health agencies
Private companies
Universities/EPST

Master

The EUR-LIVE programme gives Master students the opportunity to:

- ◆ **Acquire a shared scientific culture**, despite their diverse disciplinary background.
- ◆ **Make up their own flexible curriculum** with additional courses on vulnerability.
- ◆ **Benefit from a close transdisciplinary supervision** from multiple tutors related to two disciplinary fields or more.
- ◆ **Conduct individual research project across two disciplines** at UPEC laboratories and other academic or non-academic partners.

MASTER	S1	S2	S3	S4
UE1	Specialised curriculum			Research training at UPEC + Internship abroad
UE2	Transdisciplinary training			
UE3	Vulnerability training			

"To prepare a new generation of students to face the current unaddressed challenge of vulnerability."

Doctorate

International & interdisciplinary

- ◆ At the doctoral level, EUR-LIVE in association with UPEC's Doctoral Schools **encourage mobility with financial support** for internships or grants for research projects.
- ◆ **EUR-LIVE will update programmes regularly** based on its alumni feedback to ensure optimal professional integration.
- ◆ EUR-LIVE will enhance **pedagogical exchanges** between different UPEC departments, collaborating with academic and non-academic partners.
- ◆ Graduating from UPEC Doctoral Schools, EUR-LIVE PhD students will achieve their research **in co-direction with other universities** (national or from abroad).
